

FIRST AID POLICY

All medication must be kept at the College Office. Should children need to take regular medication, parents can complete a request form for this purpose. Please see our College First Aid Officers for more information. School is not a good place for sick children. If children are showing signs and symptoms of illness, please keep them home from school and take them to a doctor for treatment.

The Department of Health guidelines for any child who has been vomiting or had diarrhoea states that children should be excluded from school until there has not been a loose motion or vomit for **twenty-four hours**.

Parents should familiarise themselves with Parent Lounge, where they can update all information e.g. emergency contact details, medical details, change of address, etc.
